We think of sleep as a waste of time. A time when we are literally doing nothing. Yet every human on the planet spends several hours each day asleep. We are not alone. Almost every animal enjoys some form of sleep. The idea that millions of years of evolution resulted in this ability for no reason at all is ludicrous. When we are asleep we are not dormant. In fact, it is the busiest time of the day. For the past sixty years, a small number of scientists have dedicated their lives to studying the sleeping mind. This work has resulted in a series of remarkable techniques that can help people to recognize dangerous levels of sleep deprivation, get a great night's sleep, avoid nightmares, learn in their sleep, take productive power naps, decode dreams, and create a perfect nocturnal fantasy. Until now, these discoveries have been restricted to academic journals and University conferences. Professor Richard Wiseman journeys deep into this dark world and meets the vampire-like scientists who go to work when everyone else is heading for bed. Carrying out his own nocturnal mass participation studies along the way, Wiseman presents the definitive guide to the surprising new science of sleep and dreaming. For years the self-development movement has focused on improving people's waking lives. It is now time for us all to unlock that missing third of our days.

For over twenty years, psychologist Richard Wiseman has examined the quirky science of everyday life. In *Quirkology*, he navigates the oddities of human behavior, explaining the tell-tale signs that give away a liar, the secret science behind speed-dating and personal ads, and what a person's sense of humor reveals about the innermost workings of his or her mind—all along paying tribute to others who have carried out similarly weird and wonderful work. Wiseman's research has involved secretly observing people as they go about their daily business, conducting unusual experiments in art exhibitions and music concerts, and even staging fake séances in allegedly haunted buildings. With thousands of research subjects from all over the world, including enamored couples, unwitting pedestrians, and guileless dinner guests, Wiseman presents a fun, clever, and unexpected picture of the human mind.

Everyone loves a winner. Imagine being able to challenge anyone with seemingly impossible bets, safe in the knowledge that you will always win. Imagine no more. Richard Wiseman is a psychologist who has traveled the globe in search of the world's greatest bets and in "101 Bets You Will Always Win" he shows you how to use science, logic and a healthy dose of trickery always to be on the winning side of every bet you make. Using coins, dice, matchsticks and ordinary objects, you'll discover, among many other things, - how to balance a coin on the edge of a dollar bill - pick a cup up with a balloon - balance two forks and a matchstick on your fingertip - separate two glasses without touching them In explaining the bets, Wiseman also explains the science behind them making what at first seems mystifying as natural as the laws of gravity. Let YouTube sensation Richard Wiseman turn you into one of those smart people who can say "I'll bet I can..." and know that you'll never lose.
