6g74 Engine Problems - garretsen-classics.nl

The 6G7 series or Cyclone V6 engine is a series of V6 piston engines from Mitsubishi Motors. Five displacement variants have been produced from 1986 to present day, with both SOHC and DOHC, naturally aspirated and turbo charged layouts. While MIVEC variable valve timing has also been implemented in some versions the 2.5, 3.0 and 3.5 L versions were also available with gasoline direct injection.

Mitsubishi 6G7 engine - Wikipedia

In general, the 6G74 engine turned out to be quite successful, with the exception of high oil consumption, which is often noted on older cars. This is due to problems with the valve stem seals, which on 6G74 must be replaced at the first sign of oil consumption. 6G72 Tuning Today there are many different tuning programs for this 6G72 engine:
