Land Operations - GOV.UK

This manual is divided into two parts. Part one is an easy-to-read, ready reference for the combat commander and tells what psychological operations can do and how they can be used to achieve a quicker victory, conserve valuable resources, and save the lives of US and friendly personnel. Part two is for the PSYOP commander, unit, and staff personnel and others with an interest in or need for the details of psychological operations.

Filled with diagrams of attack plans, defensive strategies, and troop movements, U.S. Army Tactics Field Manual is the playbook the U.S. Army uses to employ available means to win in combat. This book provides combat-tested concepts and ideas modified to exploit emerging Army and joint capabilities. This book focuses on the organization of forces, minimum essential control measures, and general planning, preparation, and execution considerations for each type and form of combat operation. It is the common reference for all students of the tactical art, both in the field and the Army school system.

Meant for novices and experienced soldiers Describes ways to use tannerite, aluminum powder, thermite, fuse cords, fuse igniters, and more in unconventional warfare Special tactics book and a US army guide U.S. Army Special Forces Guide to Unconventional Warfare contains incredibly detailed information and visuals provided by the U.S. Army. With this guide, you will be able to easily apply its material to understand and create initiators, igniters, and incendiary materials. This is an anarchist cookbook of sorts by army guys. It is an improvised munitions handbook made from U.S. Army intelligence. The table of contents includes gelled gasoline, fire fudge, napalm, silver nitrate, concentrated sulfuric acid, fuse cords, spontaneous combustion, and delay mechanisms. Brimming with special forces secrets, this guide is a critical tool for any provocateur-in-training and provides insight into how American special forces are fighting our enemies overseas.

ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or setting. These principles reflect decades of experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act

Access Free Army Field Manuals List

decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates—they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.

Military demolitions are the destruction by fire, water, explosive, and mechanical means of areas, structures, facilities, or materials to accomplish a military objective. The U.S. Army Explosives and Demolitions Handbook is a guide to the use of explosives in the destruction of military obstacles from the Department of the U.S. Army. This guide includes information on types, characteristics, and uses of explosives and auxiliary equipment; preparation, placement, and firing of charges; safety precautions; handling, transportation, and storage of explosives; deliberate and hasty demolition methods; and much more. Applicable to nuclear and nonnuclear warfare, and having offensive and defensive uses, the knowledge one will come away with from reading this handbook is invaluable.

This Field Manual (FM 7-15) describes the structure and content of the Army Universal Task List (AUTL). The AUTL is a comprehensive, but not all-inclusive listing of Army tasks, missions, and operations. Units and staffs perform these tasks, mission, and operations or capability at corps level and below. For each task, the AUTL provides a numeric reference hierarchy, a task title, a task description, a doctrine reference, and, in most cases, recommended measures of performance (measures) for training developers to develop training and evaluation outline evaluation

Access Free Army Field Manuals List

criteria for supporting tasks. The task proponent is responsible for developing the training and evaluation outlines that supports each AUTL task. As a catalog, the AUTL captures doctrine as it existed on the date of its publication. The AUTL can help commanders develop a mission-essential task list (METL). The AUTL provides tasks, missions and operations or capabilities for a unit, company-sized and above, and staffs. Commanders should use the AUTL as a cross-reference for tasks. Commanders may use the AUTL to supplement their core training focused METL or the directed training focused METL as required.

Field Manual (FM) 6-02, Signal Support to Operations, is the premier Signal doctrine publication, and only field manual. FM 6-02 compiles Signal Corps doctrine into three chapters with supporting appendices that address network operations in support of mission command and unified land operations and the specific tactics and procedures associated with organic and nonorganic Signal forces. The fundamental idea of Signal Corps tactics is the employment and ordered arrangement of Signal forces in a supporting role to provide LandWarNet across the range of military operations. The detailed techniques regarding the ways and methods to accomplish the missions, functions or tasks of the Signal Corps indicated in this FM will be addressed in supporting Army techniques publications (ATPs). Army forces operate worldwide and require a secure and reliable communications capability that rapidly adapts to changing demands.

FM 3-05.70 is the United States Army manual used to train survival techniques (formerly the FM 21-76). It is popular among survivalists and campers. The manual covers a variety of helpful topics such as planning, psychology of survival, emergency medicine, shelter construction, water procurement, firecraft, food procurement (hunting), identification of poisonous plants, and construction of field expedient weapons, tools and equipment.
