Schlumberger

ECLIPSE is an oil and gas reservoir simulator originally developed by ECL (Exploration Consultants Limited) and currently owned, developed, marketed and maintained by SIS (formerly known as GeoQuest), a division of Schlumberger. The name ECLIPSE originally was an acronym for "ECL's Implicit Program for Simulation Engineering".

ECLIPSE Blackoil Reservoir Simulation - NEXt

In the reservoir simulations usually, the oil and gas companies depend on simulation and modeling software to produce the best representation of reservoirs of oil and gas, all the usage of equipment as well as resistivity and environmental effects.

Reservoir Simulation | Software

Reservoir simulation is an area of reservoir engineering in which computer models are used to predict the flow of fluids (typically, oil, water, and gas) through porous media. Under the model in the broad scientific sense of the word, they understand a real or mentally created structure that reproduces or reflects the object being

[Reservoir simulation - Wikipedia](#)

The ECLIPSE simulator has been the benchmark for commercial reservoir simulation for more than 25 years thanks to its extensive capabilities, robustness, speed, parallel scalability, and unmatched platform coverage. Unrivaled depth and breadth of functionality With over 30 years of continuous development and innovation, the ECLIPSE simulator is the most feature-rich and comprehensive reservoir ...
