GNU Emacs Lisp Reference Manual 2/2: Lewis, Bil, LaLiberte

...

The Emacs Lisp Reference Manual (also known as the elisp or lispref) manual, is documentation about the language used to extend Emacs, EmacsLisp. GnuEmacs has an EmacsManual, an EmacsLispIntro, and an EmacsLispReference. Starting with Emacs 22, all three manuals are included.

EmacsWiki: Emacs Lisp Reference  
Emacs has a type predicate for each type, as well as some predicates for combinations of types. A type predicate function takes one argument; it returns t if the argument belongs to the

# Read PDF Emacs Lisp Reference Manual

appropriate type, and nil otherwise. Following a general Lisp convention for predicate functions, most type predicates' names end with 'p'.

13.11 Advising Emacs Lisp Functions. When you need to modify a function defined in another library, or when you need to modify a hook like foo-function, a process filter, or basically any variable or object field which holds a function value, you can use the appropriate setter function, such as fset or defun for named functions, setq for hook variables, or set-process-filter for process ...

## 36.14 Network Connections.

Emacs Lisp programs can open stream (TCP) and datagram (UDP) network connections (see Datagrams) to other processes on the same machine or other machines. A network connection is handled by Lisp much like a subprocess, and is represented by a process object.
