"A readable and absorbing account of what advertising people try to achieve (whether or not they know quite how or why), grounded in Chris Hackley's real and recent acquaintance with the practicalities of advertising, as well as its principles.... He minimises the

inevitable jargon of linguistics and communication theory. His own language is always accurate and clear, and often engaging. The well managed flow from chapter to chapter sustains interest and enjoyment. I read the book from cover to cover in one sitting." - INTERNATIONAL JOURNAL

OF ADVERTISING "Professor Hackley's book provides a timely reminder to student and practitioner alike that advertising continues to play a key role in the successful planning and implementation of marketing communications. Underpinned by a series of topical and often thought-

provoking illustrations, this work not only explains how advertising is developed, but also presents the discipline in the wider context of socio-cultural and linguistic research.

Working from a practical advertising management basis, the text raises some key issues for advertising as

abstract theory of advertising and its effects with a hard-nosed practical approach. It is a guide to understanding and appreciating advertising and a way to understand how and why advertising works or why it does not. I think that this book is a fine text for students. Even more, it

Advertising and Promotion is not only a detailed and insightful account of how advertising is created; the book

also explains how advertising comes to cast its all-enveloping shadow over contemporary consumer culture. Many case examples drawn from major international campaigns are used to illustrate the power of advertising to portray brand 'personalities' in terms that resonate with consumers across
