This book tackles the regulatory issues of Unmanned Aerial Systems (UAS) or Remotely-Piloted Aerial Systems (RPAS), which have profound consequences for privacy, security and other fundamental liberties. Collectively known as "drones," they were initially deployed for military purposes: reconnaissance, surveillance and extrajudicial executions. Today, we are witnessing a growth of their use into the civilian and humanitarian domain. They are increasingly used for goals as diverse as news gathering, aerial inspection of oil refinery flare stacks, mapping of the Amazonian rain-forest, crop spraying and search and rescue operations. The civil use of drones is becoming a reality in the European Union and in the US. The drone revolution may be a new technological revolution. Proliferation of the next generation of "recreational" drones show how drones will be sold as any other consumer item. The cultural perception of the technology is shifting, as drones are increasingly being used for humanitarian activities, on one hand, but they can also firmly be situated in the prevailing modes of postmodern governance on the other hand. This work will be of interest to researchers in Criminology and Criminal Justice interested in issues related to surveillance, security, privacy, and technology. It will also provide a criminological background for related legal issues, such as privacy law, aviation law, international criminal law, and comparative law.

Produced as a celebration of Singapore's renowned culinary heritage, Singapore Hawker Classics Unveiled, tells you everything you ever needed to know - and more! - about 25 of our favourite dishes. The 25 delicious recipes featured will allow you to recreate your favourite

classic hawker treats at home and inspire you to look at these familiar dishes in a new light - each dish includes its traditional presentation together with an additional interpretation with a modern twist. Moreover, every dish is covered in great detail, including information on its heritage, its aroma, taste and texture, its nutritional value, as well as clear step-by-step instructions and photographs

This book combines historical, sociological and ethnographic research methods to provide a rich and multi-faceted study of the Muslim presence in Ireland in its historical and contemporary dimensions.

This book focuses on how the Northern futures are transformed through regional cooperation in the Barents eduscape: a study of the social, cultural and political aspects of higher education and the exchanges of learning and people in the Euro-Arctic Barents region, especially between Norway and Russia. Cultural exchange through higher education involving actors such as students and institutions is an integral part both of the Bologna process and of the policies currently changing higher education. It is also a process of social and cultural change of which we have limited knowledge. Cultural exchange is learned, implemented and performed by the actors who are involved, from the highest political level to the grassroots and the students themselves. Available knowledge of these macro- and micro-processes of cultural exchange is largely fragmented and distinctly framed in national and/or disciplinary (i.e. pedagogical) contexts. In order to understand the transformative potentials of higher education and cultural exchange, this book focuses on the social, cultural and political aspects of the transformations of the futures in the North. This book shows that educational cooperation between Norway and Russia is possible, but also that the existing practices are extremely vulnerable to changes seen through micro theoretical perspectives. By developing new theories which bind major theories, international political decisions, methodological procedures and contextual descriptions together, this book is a first step in the direction of institutionalizing educational cooperation between the various and different academic societies, cultures and political systems.

The title 'Phosphorus in Agriculture: 100 % Zero' is synonymous for make-or-break. And it stands up to the promise. This book sends an important message as it delivers background information, intrinsic hypotheses, validation approaches and legal frameworks, all for balanced phosphorus fertilization in agriculture. This implies firstly that the phosphorus requirement of crop is fully satisfied by applying exclusively fertilizers which contain the nutrient in completely available form. Secondly, environmental demands through eutrophication and hazardous contaminants must not be compromised. The book identifies equally knowledge gaps and deficits in the transformation and implementation of research into practice. Bottom line is that research delivers the tools for a sustainable phosphorus management

while legal frameworks are insufficient.

?This book will provide one of the first comprehensive approaches to the study of smart city governments with theories and concepts for understanding and researching 21st century city governments innovative methodologies for the analysis and evaluation of smart city initiatives. The term "smart city" is now generally used to represent efforts that in different ways describe a comprehensive vision of a city for the present and future. A smarter city infuses information into its physical infrastructure to improve conveniences, facilitate mobility, add efficiencies, conserve energy, improve the quality of air and water, identify problems and fix them quickly, recover rapidly from disasters, collect data to make better decisions, deploy resources effectively and share data to enable collaboration across entities and domains. These and other similar efforts are expected to make cities more intelligent in terms of efficiency, effectiveness, productivity, transparency, and sustainability, among other important aspects. Given this changing social, institutional and technology environment, it seems feasible and likeable to attain smarter cities and by extension, smarter governments: virtually integrated, networked, interconnected, responsive, and efficient. This book will help build the bridge between sound research and practice expertise in the area of smarter cities and will be of interest to researchers and students in the e-government, public administration, political science, communication, information science, administrative sciences and management, sociology, computer science, and information technology. As well as government officials and public managers who will find practical recommendations based on rigorous studies that will contain insights and guidance for the development, management, and evaluation of complex smart cities and smart government initiatives.?

Foreign Policies of EU Member States provides a clear and current overview of the motivations and outcomes of EU Member States regarding their foreign policy-making within and beyond the EU. It provides an in-depth analysis of intra-EU policy-making and sheds light, in an innovative and understandable way, on the lesser-known aspects of the inter-EU and extra-EU foreign policies of the twenty-eight Member States. The text has an innovative method of thematic organisation in which case study state profiles emerge via dominant foreign policy themes. The text examines the three main policy challenges currently faced by the twenty-eight Member States: First, EU Member States must cooperate within the mechanisms of the EU, including the Common Foreign and Security Policy (CFSP). Second, EU Member States continue to construct their own inter-EU foreign policies. Third, the sovereign prerogative exercised by all EU Member States is to construct their own foreign policies on everything from trade and defence with the rest of the world. This combination of clarity, thematic structure and empirical case studies make this an ideal textbook for all upper-level students of European foreign policy, comparative European politics and

European studies.

From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution.

Using a comparative framework, this volume presents case studies of issues of public procurement and discusses how procurement professionals and policy makers in different regions are responding to these challenges. This book discusses current issues in public procurement. Over the past few decades, public procurement has had to evolve conceptually and organizationally in the face of unrelenting budget constraints, government downsizing, public demand for increased transparency in public procurement, as well as greater concerns about efficiency, fairness and equity. Procurement professionals have also had to deal with a changeable climate produced by emerging technology, environmental concerns, and ongoing tension between complex regional trade agreements and national socioeconomic goals. The first section discusses innovation and reforms in public procurement and how practitioners are adapting to and making use of new technologies. The second section addresses the challenges of maintaining transparency, equity, and fairness in public procurement. The final section discusses preferential public procurement and introduces strategies for building sustainable public procurement systems. By combining theory and analysis with evidence from the real world, this book is of equal use to academics, policy makers, and procurement professionals.

In addition to conflicts and related security disruptions in the Arab region, a significant fall in oil prices and their uncertain prospects have become a predominant economic concern, with prices plunging by more than 50 per cent in the second half of 2014. Nevertheless, member countries of the Gulf Cooperation Council (GCC) have continued to lead growth in the Arab region. This edition of the Survey of Economic and Social Developments in the Arab Region looks at the continued expansion of the non-oil sector as it maintains GCC economic growth. Lower oil prices have not yet negatively affected the GCC economically, although confidence has dropped with weakening stock markets and real estate transactions. Furthermore, lower oil prices have benefited oil-importing Arab countries by easing their balance-of-payment and fiscal constraints. With conflict and violence in the region, one of the main channels for economic stabilization has been intraregional flows of capital and remittances from the GCC countries.
