"The rules of the Numismatic Society of London" bound with New Ser., v. 1.

Vol. 1-new ser., v. 7 include the society's Proceedings for 1841-1929 (title varies)

This book, analyzing the government of Florence during one of her most critical periods, and the forces that destroyed it, is the first study of the Florentine Trecento to use archival sources of the communal

government systematically. Originally published in 1962. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Late Roman Gaul is often seen either from a classical Roman perspective as an imperial province in decay and under constant threat from barbarian invasion or settlement, or from the medieval one, as the cradle of modern France and Germany. Standard texts and "moments" have emerged and been canonized in the scholarship on the period, be it Gaul aflame in 407 or the much-disputed baptism of Clovis in 496/508. This volume avoids such stereotypes. It brings together state-of-the-art work in archaeology, literary, social, and religious history, philology, philosophy, epigraphy, and numismatics not only to examine under-used and new sources for the period, but also critically to reexamine a few of the old standards. This will provide a fresh view of various more unusual aspects of late Roman Gaul, and also, it is hoped, serve as a model for ways of interpreting the late Roman sources for other areas, times, and contexts.
