In June 1997, Paul Kraus was diagnosed with mesothelioma, a very aggressive cancer, and given only a few months to live. More than eight years later, Mr. Kraus is alive with a good quality of life having rejected surgery, radiation, and chemotherapy. Here, the author offers solid practical advice on: how to cope with the initial diagnosis; nutrition and diet; conventional and

complementary therapies; the role of the mind in health and the principles of healing.--From publisher description.

Rising to Power is a time tested, wisdom-packed guide for executives desiring to be exceptional leaders as they navigate their ascent to the highest levels of their organization. Nearly two-thirds of all leaders entering executive roles lack sufficient understanding of what is required and are unprepared for what they will face, which explains why 50 percent of them fail within the first eighteen months. For decades we have known that failure rates among transitioning executives are too high, causing exorbitant costs, damaged organizations,

and stalled careers. Still, little has changed in the way organizations prepare leaders to assume executive positions. Three-fourths of new executives say their organization did not adequately prepare them for the executive office. It doesn't have to be this way. If you are an executive—or you're aspiring to be one—and considering how you will navigate the ascent in your organization, *Rising to Power* will serve you like no other resource can. Odds are high you have watched a promising executive fail on their way up. Like many, you scratched your head, wondering, “Why didn't they see that coming?” Now you're hoping not to be the next one that falls. *Rising to Power* will guide you on a predictable journey of ascent, through the transitional

moments and issues most common in executive failure. It will bolster your confidence, open your eyes, deepen your insight, and if you let it, reveal your own proclivities for failure that you may not even recognize. Based on a ten-year longitudinal study, *Rising to Power* offers a profoundly new way of looking at an executive 's rise in an organization, and offers an approach to significantly increase your odds of success.

By the New York Times bestselling author: a provocative account of the attack on the humanities, the rise of intolerance, and the erosion of serious learning America is in crisis, from the university to the workplace. Toxic ideas first spread by higher education

have undermined humanistic values, fueled intolerance, and widened divisions in our larger culture. Chaucer, Shakespeare and Milton? Oppressive. American history? Tyranny. Professors correcting grammar and spelling, or employers hiring by merit? Racist and sexist. Students emerge into the working world believing that human beings are defined by their skin color, gender, and sexual preference, and that oppression based on these characteristics is the American experience. Speech that challenges these campus orthodoxies is silenced with brute force. The Diversity Delusion argues that the root of this problem is the belief in America ' s endemic racism and sexism, a belief that has engendered a metastasizing diversity

bureaucracy in society and academia. Diversity commissars denounce meritocratic standards as discriminatory, enforce hiring quotas, and teach students and adults alike to think of themselves as perpetual victims. From #MeToo mania that blurs flirtations with criminal acts, to implicit bias and diversity compliance training that sees racism in every interaction, Heather Mac Donald argues that we are creating a nation of narrowed minds, primed for grievance, and that we are putting our competitive edge at risk. But there is hope in the works of authors, composers, and artists who have long inspired the best in us. Compiling the author's decades of research and writing on the subject, *The Diversity Delusion* calls for

a return to the classical liberal pursuits of open-minded inquiry and expression, by which everyone can discover a common humanity.

Anthropology is the study of all humans in all times in all places. But it is so much more than that.

"Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey?

You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first

OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There ' s just one problem: most of these solutions are making things worse. Creativity isn ' t produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet,

they are tearing us apart. When we 're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.
