"There is an increasing need for knowledge of toxicology to safeguard the use of chemicals in industry, public and private sectors. The study of toxicology is becoming increasingly relevant in human health sciences, as future health and clinical professionals will be pivotal to address and manage emerging chemical threats and hazards related to modern anthropogenic activities and technological development. Comprising a series of chapters from leading toxicology, pharmacy and public health academics and experts across Europe, the United States and beyond, Toxicology for the Health and Pharmaceutical Sciences provides a concise yet comprehensive volume that can be used as a relevant textbook on toxicology for the clinical, healthcare, educational and professional sectors. This book covers the fundamentals and recent developments in toxicology, to respond to local and global chemical, pharmaceutical and environmental threats. Thus, this volume has chapters specifically designed to support the understanding of the most current, toxicology-related subjects for any undergraduate/postgraduate health programmes, as well as aiding with the delivery of continuing professional development training on up-to-date topics in toxicology for current practicing health professionals wishing to improve their background knowledge in toxicology. The book is also vital reading, and reference for policy makers, and others that influence, and decide regulations that have an impact on the environment, and human health"--

In 1999 TiVo was preparing to launch its digital video recorder (DVR) in the United States. The company's goal was ambitious: it hoped to revolutionize how Americans watched television and to become a central player in the emerging interactive TV industry. Although it had a technological advantage, TiVo faced one competitor (ReplayTV) and potential entrants such as Microsoft, so its success was far from guaranteed. Evidence suggested a bright future for the company, however; the concept had attracted \$240 million in venture capital, and market research indicated a uniquely high level of consumer interest. TiVo needed to capture the first-mover advantage and build its sales and brand as quickly as possible to support the company's IPO, which was planned to take place within eighteen to twenty-four months. TiVo's positioning at launch would play a key role in determining its success. After analyzing and discussing the case, students should be able to:

- Use analogies appropriately to forecast demand
- Use various marketing research techniques to make appropriate inferences about the challenges to consumer adoption of an innovative product
- Develop multiple frames of reference and discuss the merits of each
- Develop multiple points of difference and discuss the merits of each
- Develop multiple positioning statements and discuss the merits of each.

The visibility of the U.S. LGBTQ+ movement and the strength of its voices stems from the heroes who

fought for equality and self-expression. This book discusses the lives and impact of these heroes by exploring their march toward progress, from the early sparks of the movement before Stonewall to the prolific activists of today. Readers will gain an understanding of the creative efforts activists and professionals put into advocating for their legal, professional, and personal needs, and they will come away with an understanding of why that representation matters.
