"This book fills the gap between theory-laden academic books designed to help academic faculty incorporate self-directed learning activities into their courses and the self-help books designed to help motivate individuals to learn new skills"--

About the Book This book has been designed keeping in mind the needs of professionals who are preparing for the Independent Director's Online Proficiency Self-Assessment Test. The book would be immensely useful for the chartered accountants, company secretaries, lawyers and management professionals while undertaking the Independent Director's examination as it gives the updated provisions of different statutes and MCOs relevant for it. Contents Chapter 1: Companies Act, 2013 and relevant Rules (sections 3 to 246) Chapter 2: Secretarial Standards (SS-1 and SS-2) Chapter 3: Securities Laws and Regulations (covering SEBI Act, 1992; SEBI (LODR) Regulations, 2015; SEBI (ICDR) Regulations, 2018; Securities Contracts (Regulation) Act, 1956 and Depositories Act, 1996) Chapter 4: Independent Director (covering entire day-to-day reference materials specially meant for the Independent Directors) Chapter 5: Corporate Governance & Strategy (covering corporate governance and board effectiveness matters) Chapter 6: Financial Accountancy (covering understanding about the Accounting Standards, Balance-Sheet, Profit & Loss Account, Cash Flow Statements, CARO-2020 and the Financial Ratios) Chapter 7: Case Laws (Includes 7 leading case studies)

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Fuel Injection is a key process characterizing the combustion development within Internal Combustion Engines (ICEs) and in many other industrial applications. State of the art in the research and development of modern fuel injection systems are presented in this book. It consists of 12 chapters focused on both numerical and experimental techniques, allowing its proper design and optimization.

A company's reputation is one of its most valuable assets, and reputational risk is high on the agenda at board level and amongst regulators. Rethinking Reputational Risk explains the hidden factors which can both cause crises and tip an otherwise survivable crisis into a reputational disaster. It uses case studies such as BP's Deepwater Horizon oil spill, Volkswagen's emissions rigging scandal, Tesco, AIG, EADS Airbus A380, and Mid-Staffordshire NHS Hospital Trust. Reputations are lost when the perception of an organization is damaged by its behaviour not meeting stakeholder expectations. Rethinking Reputational Risk lays bare the actions, inactions and local 'states of normality' that can lead to perception-changing consequences and gives readers the insight to recognize and respond to the risks to their reputations. Through case studies and analysis of failures, this hard-hitting guide also applies lessons drawn from behavioural economics to the behavioural risks that underlie reputation risk. An essential read for risk professionals, business leaders and board members who need to understand and deal with business-critical threats to their reputation, this book presents a new framework that will be invaluable for all involved in safeguarding an organization's reputation.

'In this era of 'snackable' content which satisfies only in the moment, it's great to have a comprehensive Advertising Handbook which one can consult repeatedly. The references are comprehensive and the Handbook opens up many key areas for practitioners' - Hamish Pringle, Director General, IPA 'Finally, a Handbook of Advertising that brings the field up-to-date. I am impressed with its comprehensive coverage of topics and the distinguished specialists who have shared their key findings with us' - Philip Kotler, Kellogg School of Management 'When trying to make sense of the mystifying world of advertising, academics and practitioners often seem to inhabit separate universes. Not in this Handbook. For once, the best brains from each side genuinely collude – with constructive results. Wise agencies will read it before their clients do' - Sir Martin Sorrell, CEO, WPP 'This mighty tome brings together a vast range of views of advertising based on deep experience and scholarship. For practitioners and academics alike, it will be a voyage of discovery and enlightenment' - Lord (Maurice) Saatchi, Chairman, M&C Saatchi 'This magnificent volume captures all we need to know about how advertising works and its context' - Baroness (Peta) Buscombe, Director General, Advertising Association, London Advertising is a field that has attracted a great deal of academic attention, but to date there has been no summarising of the state of the art of research. This far reaching and scholarly Handbook is edited by two highly respected and trusted thinkers in the field and includes contributions from leading academics based in both the UK and the USA. Tim Ambler and Gerald J Tellis archive their aim of setting advertising and the theory that underpins it in its historical and societal context, show-casing the most significant advertising research questions of our time and pointing readers in the direction of future avenues for fruitful investigation. The SAGE Handbook of Advertising would be a welcome addition to any marketing academics bookshelf.

Organizational Compliance and Ethics is designed to provide the theoretical and practical foundations for a career in global compliance, addressing the full range of subject matters that a lawyer may encounter in managing legal risk for a multinational enterprise. While the book explores this new field through the prism of the FCPA, it imparts a skill-set that is broadly applicable to different industries and compliance-related functions. In particular, students learn how to tailor a compliance program to an enterprise 's specific operations and business strategy. Professors and students will benefit from: Clear and coherent presentation of compliance as a distinct field of practice Combination of statutory and regulatory analysis with contextual discussion of history and evolution of the field Extensive discussion of organizational culture and the role of corporate leaders in setting the right tone Hypotheticals involving real-world scenarios that present students with the practical realities of being a compliance lawyer in a global economy " Test Your Knowledge " sections following each Part, which provide comprehensive assessment tools Detailed treatment of corporate social responsibility and ethical obligations of multinational enterprises operating in emerging markets Teaching materials include: A Comprehensive Teacher 's Manual derived from the author 's practical and teaching experience, and designed to offer a " plug-and-play " teaching experience through the inclusion of: A complete set of slides used to teach the included 4-credit course, featuring: Extensive multimedia aids (charts, graphs, illustrations) Slides-by-slide guidance, including detailed talking points, analysis, and answers to questions and hypotheticals, drawn from 50+ hours of transcribed time spent teaching from those same slides A sample course requirements memo Sample syllabi for 2-, 3- and 4-credit course Online appendices Numerous sample exams, with grading rubrics

As with any industry, the education sector goes through frequent changes due to modern technological advancements. It is every educator 's duty to keep up with these shifting requirements and alter their teaching style to best fit the needs of their classroom. Pre-Service and In-Service Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. It also emphasizes the growing role of technology in teacher skill development and training as well as key pedagogical developments and methods. Highlighting a range of topics such as teacher preparation programs, teaching standards, and fieldwork and practicum experiences, this multi-volume book is designed for pre-service teachers, teacher educators, researchers, professionals, and academics in the education field.
