Web Server Technology: Yeager, Nancy J., McGrath, Robert E ...
A web server is server software, or hardware dedicated to running this software, that can satisfy client requests on the World Wide Web. A web server can, in general, contain one or more websites. A web server processes incoming network requests over HTTP and several other related protocols. The primary function of a web server is to store, process and

deliver web pages to clients. The communication between client and server takes place using the Hypertext Transfer Protocol (HTTP).
