On VW cars, this is called the Emissions Control or Engine Management Lamp, but you ' ll probably know it as the check engine light. When the check engine warning light is illuminated it ' s often accompanied by tell-tale signs that the engine is not working properly, such as a lack of power or stuttering as you press the accelerator.

Here, Volkswagen enthusiast and prolific author Richard Copping examines, for the first time, the complete story of the T4 from the Transporter concept originated forty years before its presence at VW's Hanover factory, through its development period and full production life. Topics covered include: the background story 1949-1990; design concept to production in the 1980s; full analysis of the T4's specifications; face-lifted Caravelles and Multivans from 1996 onwards; petrol- and diesel-aspirated engines including the VR6, V6 and 2.5 litre TDI; the T4 story in the USA - the Euro Van and finally camping conversions. The complete story of the Volkswagen T4, produced between 1990 and 2003 and the first book in the English language to have been written, illustrated and published solely about the T4, beautifully illustrated with 300 colour photographs - a sparkling mixture of archive and modern-day imagery.

Essay from the year 2003 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 74% (A) entspricht 1.0, University of Teesside (Tesside Business School), course: Managing Markets, language: English, abstract: After the introduction of the first Volkswagen luxury car in May 2002, sales are still far behind the Volkswagen's expectation (Handelsblatt, 2003). It seems that the VW Phaeton faces the same destiny as its antique namesake Phaeton. In the Greek mythology, Phaeton was the son of Helios, the sun god. Helios has driven the family chariot across the sky, wearing the rays of the sun as a crown, lighting the day. One day Phaeton convinced his father to lend him the beautiful chariot. But Phaeton, in contrast to his father, was not able to drive the chariot appropriately, and drove the chariot so close to the earth that he boiled the oceans and scorched the land. So Zeus had to stop him by killing him with a lightning bolt (Vaughn, 2003). Volkswagen certainly had not considered this explanation when naming the Phaeton, but referred more likely to the second meaning of Phaeton; an elegant carriage of the 17th century which the owners drove on their own. Nevertheless, there are signs that the Volkswagen engagement in the high-class (luxury) car market is tougher than expected. It seems people are less persuadable to buy a high-quality car of the experienced and renowned German car manufacturer. This shows the divergence of the formerly targeted 12.000 to 15.000 units (Weernink, 2001) annually in global sales 2003 which is opposed by the actual numbers of only 2.600 units in Germany - the main market of the Phaeton - from January to October (Kraftfahrtbundesamt KBA) and estimated sales of 3500 units worldwide (Handelsblatt, 2003). The targeted sales of 20.000 units in 2004 (Weernink, 2003) seem to be completely unrealistic. But the Volkswagen top-management remained silent. Although Volkswagen always claims
